Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 and 5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the species disclosed in the specification, does not reasonably provide enablement for species other than taught in the specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Beside the species disclosed in the specification, there is no teaching or guidelines to teach one ordinary skilled in the art how to connect (react) between isoleucine derivative and carbazolyl. Also, see the section below.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1-3 and 5, the terms isoleucine derivative and carbazolyl are too broadly claimed because first isoleucine derivative and carbazolyl are indefinite and secondary they have enormous combinations between isoleucine derivative and carbazolyl.

Claims 2 and 3, the notations n and m do not have upper limit.

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
